

The Embarrassed Egg and Osmosis

www.movingmountainsdaily.com

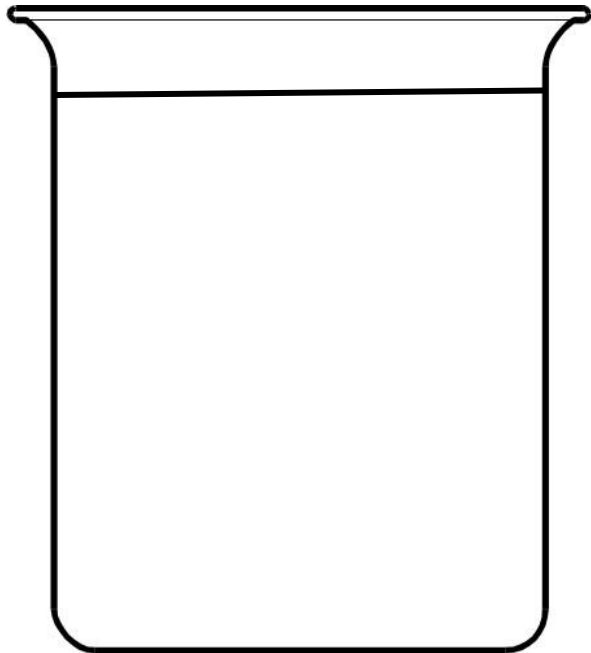

Draw the egg that best represents what the egg looked like in each experiment.

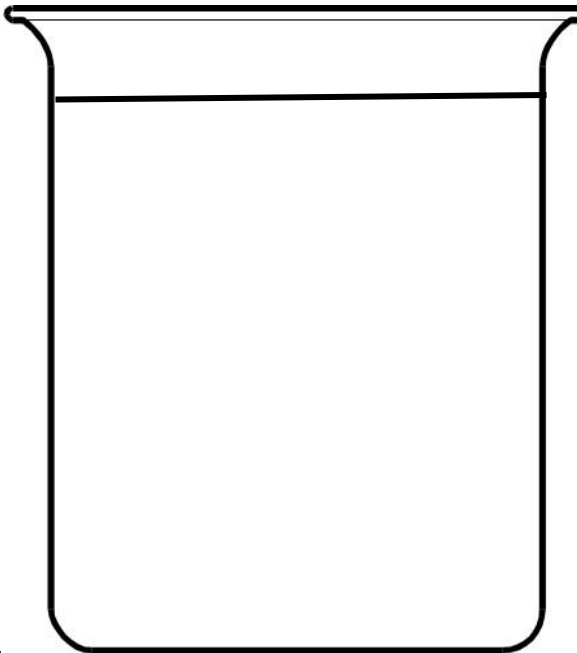

The egg in vinegar

The egg in corn syrup

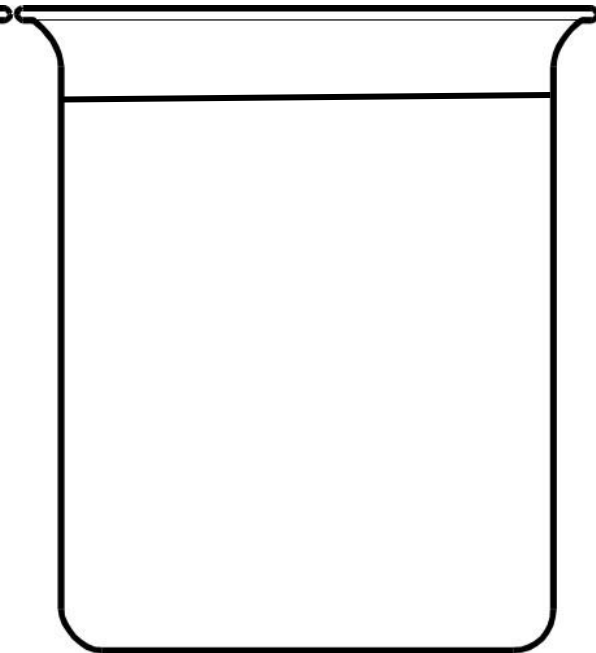

The egg in tap water

Water molecules moved **into** the egg.

Water molecules moved **out** of the egg.

Water molecules moved **back into** the egg.

Can you draw the water molecules too? Where do you think the most water molecules would be?
